Filed: July 12, 2001

For: CHRYSANTHEMUM PLANT NAMED 'WHITE ELITE REAGAN'

APPEAL BRIEF TRANSMITTAL

MAIL STOP APPEAL  
BRIEF-PATENTS  
Commissioner for Patents  
P. O. Box 1450  
Alexandria, Virginia 22313-1450

Sir:

Attached hereto are three (3) copies of our Brief on Appeal in the above-identified application.

Also attached hereto is our Check No. 17352 in the amount of One Hundred Sixty-Five Dollars (\$165.00) small entity for the Brief fee. In the event this check should become detached, please debit our Deposit Account No. 16-0331 as needed in order to effect proper filing of this Brief.

Respectfully submitted,

PARKHURST & WENDEL, L.L.P.

## BRIEF ON APPEAL

### I. REAL PARTY IN INTEREST

The real party in interest is CHRYSANTHEMUM BREEDERS ASSOCIATION, N.V. of the Netherlands, whose ownership interest appears in an Assignment recorded July 12, 2001 at Reel 011989, Frame 0429.

### II. RELATED APPEALS AND INTERFERENCES

Briefs on Appeal have been filed in application Serial Nos. 09/276,702, 09/708,588, 09/902,750, and 09/923,534 on October 6, 2003, December 8, 2003, January 13, 2004, and January 13, 2004, respectively, which involve the same type of rejection before the Board as in this case.

### III. STATUS OF CLAIMS

Claim 1 reads as it was filed with the application.

### IV. STATUS OF AMENDMENTS

Although no change was made to the claim, a substitute application was filed with an Amendment Under 37 CFR 1.111 on December 10, 2002. Further changes to the specification were made in an Amendment filed May 27, 2003. A Request For Reconsideration

Serial No. 09/902,767

was filed October 17, 2003 in reply to the Final Rejection mailed August 12, 2003. No present paper seeking a change either to the specification or to the claim is in the case.

#### V. SUMMARY OF INVENTION

The invention is directed to a new variety of chrysanthemum plant named 'White Elite Reagan', which is described in the specification and depicted in the figures filed therewith.

#### VI. ISSUE

The sole issue before the Board of Appeals and Patent Interferences is whether claim 1 was properly rejected under 35 USC 102(b) as anticipated by PBR application No. NL PBR CHR 2752 filed April 2, 1996 and published May 18, 1996 in view of the admission by appellant that 'White Elite Reagan' was first sold (outside the United States) in December 1998.

#### VII. GROUPING OF CLAIMS

There is one claim in the case and its patentability will be considered by the Board here.

### VIII. ARGUMENT

The rejection is based upon two pieces of evidence, neither of which meets the definitions of proper prior art under 35 USC 102(b).

A. The Published PBR Application is Not Enabling and Thus is Not Prior Art

The published PBR application used in the rejection is not enabling as the Examiner apparently has admitted. See lines 20 and 21 of page 4 of the Final Rejection mailed August 12, 2003 containing the acknowledgment that "no amount of detail will make a plant publication enabling unless the plant was publicly available." (Indeed, the USPTO seems officially to have acknowledged that PBR certificates are not enabling. See the Petition Decision mailed March 28, 2002 in application Serial No. 09/557,043, especially the fifth sentence in the third full paragraph on page 2 reading: "However, the PBR Certificate is not an enabled reference under 35 USC 102 unless coupled with public availability of the plant itself." Appellant does not agree with the breadth of the "unless" phrase. The sentence, however, states clearly the USPTO awareness that a published PBR application standing alone is not enabling, does not meet the requirements of the first paragraph of 35 USC 112, and thus is not prior art under 35 USC 102(b). See In re Donahue, 776 F.2d 531, 226 USPQ 619 (Fed.

Cir. 1985). Thus, the published PBR application standing alone does not qualify as prior art under 35 USC 102(b).

The published PBR application may be a "printed publication" in a general sense but that published PBR application by both law (Donahue) and the USPTO's admission doesn't qualify as prior art under 35 USC 102(b). The source of the document (either domestic or foreign) is irrelevant when the text of that document is sufficiently lacking to disqualify the document as prior art under 35 USC 102(b).

The Examiner mentions on page 3 of the Final Rejection a section from Robinson on Patents regarding what constitutes a "prior publication" but the last three of the five elements listed establish that the published PBR application is not proper prior art here. The claimed subject matter was invented prior to the publication of the PBR application and that published application is not enabling. The reference thus is not proper prior art.

Appellant also disagrees strongly with the rationale expressed at page 4, lines 4 to 8 of the Final Rejection in justification of how the published PBR application is enabled. There the Examiner asserts, "By using the referenced publication [admitted to be non-enabled], one of skill in the art would have been able to contact the Applicant, Breeder, and Title Holder of the plant in question and subsequently obtain a plant since it was being marketed by

Applicant's own admission." The requirements for enablement under the first paragraph of 35 USC 112 deal with documents and no case law, including that discussed infra, of which the undersigned is aware has ever stretched a reed so thin in justification of a position asserting that an unenabling publication becomes enabling taken with other evidence that itself does not qualify as statutory prior art.

The United States Court of Appeals for the Federal Circuit recently reaffirmed in Elan Pharmaceuticals v. Mayo Foundation, No. 00-1467, October 2, 2003, that a non-enabling reference is not de jure prior art. The court through Circuit Judge Newman stated:

To serve as an anticipating reference, the reference must enable that which it is asserted to anticipate. 'A claimed invention cannot be anticipated by a prior art reference if the allegedly anticipatory disclosures cited as prior art are not enabled.' Amegen, Inc. v. Hoechst Marion Roussel, Inc., 314 F.3d 1313, 1354, 65 USPQ2d 1385, 1416 (Fed.Cir. 2003) See Bristol-Myers Squibb v. Ben Venue Laboratories, Inc. 246 F.3d 1368, 1374, 58 USPQ2d 1508, 1512 (Fed.Cir. 2001) ('To anticipate the reference must also enable one of skill in the art to make and use the claimed invention.');

PPG Industries, Inc. v. Guardian Industries Corp., 75 F.3d 1558, 1566, 37 USPQ2d 1618, 1624 (Fed. Cir. 1996) ('To anticipate a claim, a reference must disclose every element of the challenged claim and enable one skilled in the art to make the anticipating subject matter.')

(Slip op. at page 5.)

Lacking enablement, the publication is not anticipatory.

B.    A Sale Abroad is Not a Patent  
      Defeating Act and Thus is Not Prior Art

35 USC 102(b) specifies also that a patent-defeating act is public use of the invention or placing the invention on sale "in this country, more than one year prior to the date of the application for patent in the United States." Thus, public use of the invention outside the United States or placing the invention on sale outside the United States is not a patent-defeating act.

The error in the Examiner's position, we say with respect, is that the sale abroad is permitted to be considered jointly with the published PBR application. The sale is not prior art under Title 35 United States Code. The present situation is not analogous to that in In re Samour, 571 F.2d 559, 197 USPQ 1 (CCPA 1978) where the rejection was based upon a consideration of two U.S. patents, each of which clearly qualified as prior art under 35 USC 102. Indeed, we have a situation here where neither piece of evidence relied on to support the rejection qualifies as prior art under 35 USC 102. The rejection to be proper must be made under statutory law, not metaphysical law.

C.    Other Justifications Posed by the  
      Examiner Do Not Make the Rejection Proper

The Examiner has also cited Ex parte Thomson, 24 USPQ2d 1618 (Bd. Pat. App. & Inter. 1992) in support of the rejection. The

holding does not support the instant rejection. (The USPTO did not use Thomson as a basis for a rejection of this type until recently.) That case involved a utility application rather than a plant patent application. Moreover, the materials sold in that case were seeds, not plants. The Board panel justified its decision by stating that the necessary enablement came about "by purchase and planting of the requisite seeds." 24 USPQ2d at 1620. The panel also distinguished the situation in In re LeGrice, 133 USPQ 365 (CPA 1962) from the situation before it, pointing out, "Unlike the seeds of the asexually reproduced roses of LeGrice which would not produce the claimed rose, the sexually reproduce [sic] of the Siokra cultivar do reproduce the claimed Siokra cultivar." 24 USPQ2d at 1621. The panel in a footnote to the foregoing sentence remarked, "Another point of distinction is that whereas LeGrice concerned a plant patent, appellant seeks a utility patent, which affords a broader scope of protection." The Thomson and LeGrice cases presented distinctly different situations and neither bars patentably here. Indeed, LeGrice permits patentability in this case. The LeGrice court surely was aware that the plants in that case had been sold abroad; see the sentence in the first paragraph of the opinion reading "The publications occur in the National Rose Society Annual of England and in catalogues." 133 USPQ at 367. The court did not use those sales

as a basis to affirm the position of the Patent Office there. The court, rather, reversed the rejection under 35 USC 102 holding the publications to be non-enabling.

The holdings in neither In re Samour nor In re Donahue support the rejection. All of the references used in the "combined" 35 USC 102 rejections in those opinions were de jure prior art to the respective appellants. That situation does not exist here.

D. The Rejection is in Violation  
of the UPOV Convention

Moreover, the position taken by the USPTO in a rejection of this type is believed to violate the UPOV Convention.

Chapter III, Article 6 of the UPOV Act of 1991 includes the following:

(1) Criteria-the variety shall be deemed to be new if, at the time of filing the application for a breeders' right, propagating or harvested material of the variety has not been sold or otherwise disposed to others, by or with consent of the breeder, for purposes of exploitation of the variety (i) in the territory of the contracting party in which the application has been filed earlier than one year before that date and (ii) in a territory other than that of the contracting party in which the application has been filed earlier than four years or in the case of trees and vines, earlier than six years before that date. (Emphasis added.)

In the present case, the U.S. filing date was July 12, 2001, and the first sale abroad was in December 1998. Thus, 'White Elite Reagan' meets the criteria for novelty in the UPOV 1991 Act to be

Serial No. 09/902,767

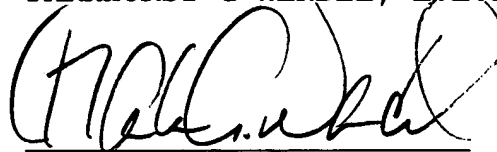

eligible for a PBR grant in the USA. It is believed that the same criteria should be applied to plant patents and the claim is patentable for this and the other reasons presented.

IX. CONCLUSION

For the foregoing reasons, it is respectfully submitted that claim 1 has been improperly rejected and the Board is asked to so hold.

Respectfully submitted,

PARKHURST & WENDEL, L.L.P.

## BRIEF ON APPEAL

### I. REAL PARTY IN INTEREST

The real party in interest is CHRYSANTHEMUM BREEDERS ASSOCIATION, N.V. of the Netherlands, whose ownership interest appears in an Assignment recorded July 12, 2001 at Reel 011989, Frame 0429.

### II. RELATED APPEALS AND INTERFERENCES

Briefs on Appeal have been filed in application Serial Nos. 09/276,702, 09/708,588, 09/902,750, and 09/923,534 on October 6, 2003, December 8, 2003, January 13, 2004, and January 13, 2004, respectively, which involve the same type of rejection before the Board as in this case.

### III. STATUS OF CLAIMS

Claim 1 reads as it was filed with the application.

### IV. STATUS OF AMENDMENTS

Although no change was made to the claim, a substitute application was filed with an Amendment Under 37 CFR 1.111 on December 10, 2002. Further changes to the specification were made in an Amendment filed May 27, 2003. A Request For Reconsideration

was filed October 17, 2003 in reply to the Final Rejection mailed August 12, 2003. No present paper seeking a change either to the specification or to the claim is in the case.

#### V. SUMMARY OF INVENTION

The invention is directed to a new variety of chrysanthemum plant named 'White Elite Reagan', which is described in the specification and depicted in the figures filed therewith.

#### VI. ISSUE

The sole issue before the Board of Appeals and Patent Interferences is whether claim 1 was properly rejected under 35 USC 102(b) as anticipated by PBR application No. NL PBR CHR 2752 filed April 2, 1996 and published May 18, 1996 in view of the admission by appellant that 'White Elite Reagan' was first sold (outside the United States) in December 1998.

#### VII. GROUPING OF CLAIMS

There is one claim in the case and its patentability will be considered by the Board here.

VIII. ARGUMENT

The rejection is based upon two pieces of evidence, neither of which meets the definitions of proper prior art under 35 USC 102(b).

A. The Published PBR Application is Not Enabling and Thus is Not Prior Art

The published PBR application used in the rejection is not enabling as the Examiner apparently has admitted. See lines 20 and 21 of page 4 of the Final Rejection mailed August 12, 2003 containing the acknowledgment that "no amount of detail will make a plant publication enabling unless the plant was publicly available." (Indeed, the USPTO seems officially to have acknowledged that PBR certificates are not enabling. See the Petition Decision mailed March 28, 2002 in application Serial No. 09/557,043, especially the fifth sentence in the third full paragraph on page 2 reading: "However, the PBR Certificate is not an enabled reference under 35 USC 102 unless coupled with public availability of the plant itself." Appellant does not agree with the breadth of the "unless" phrase. The sentence, however, states clearly the USPTO awareness that a published PBR application standing alone is not enabling, does not meet the requirements of the first paragraph of 35 USC 112, and thus is not prior art under 35 USC 102(b). See In re Donahue, 776 F.2d 531, 226 USPQ 619 (Fed.

Cir. 1985). Thus, the published PBR application standing alone does not qualify as prior art under 35 USC 102(b).

The published PBR application may be a "printed publication" in a general sense but that published PBR application by both law (Donahue) and the USPTO's admission doesn't qualify as prior art under 35 USC 102(b). The source of the document (either domestic or foreign) is irrelevant when the text of that document is sufficiently lacking to disqualify the document as prior art under 35 USC 102(b).

The Examiner mentions on page 3 of the Final Rejection a section from Robinson on Patents regarding what constitutes a "prior publication" but the last three of the five elements listed establish that the published PBR application is not proper prior art here. The claimed subject matter was invented prior to the publication of the PBR application and that published application is not enabling. The reference thus is not proper prior art.

Appellant also disagrees strongly with the rationale expressed at page 4, lines 4 to 8 of the Final Rejection in justification of how the published PBR application is enabled. There the Examiner asserts, "By using the referenced publication [admitted to be non-enabled], one of skill in the art would have been able to contact the Applicant, Breeder, and Title Holder of the plant in question and subsequently obtain a plant since it was being marketed by

Applicant's own admission." The requirements for enablement under the first paragraph of 35 USC 112 deal with documents and no case law, including that discussed infra, of which the undersigned is aware has ever stretched a reed so thin in justification of a position asserting that an unenabling publication becomes enabling taken with other evidence that itself does not qualify as statutory prior art.

The United States Court of Appeals for the Federal Circuit recently reaffirmed in Elan Pharmaceuticals v. Mayo Foundation, No. 00-1467, October 2, 2003, that a non-enabling reference is not de jure prior art. The court through Circuit Judge Newman stated:

To serve as an anticipating reference, the reference must enable that which it is asserted to anticipate. 'A claimed invention cannot be anticipated by a prior art reference if the allegedly anticipatory disclosures cited as prior art are not enabled.' Amegen, Inc. v. Hoechst Marion Roussel, Inc., 314 F.3d 1313, 1354, 65 USPQ2d 1385, 1416 (Fed.Cir. 2003) See Bristol-Myers Squibb v. Ben Venue Laboratories, Inc. 246 F.3d 1368, 1374, 58 USPQ2d 1508, 1512 (Fed.Cir. 2001) ('To anticipate the reference must also enable one of skill in the art to make and use the claimed invention.');

PPG Industries, Inc. v. Guardian Industries Corp., 75 F.3d 1558, 1566, 37 USPQ2d 1618, 1624 (Fed. Cir. 1996) ('To anticipate a claim, a reference must disclose every element of the challenged claim and enable one skilled in the art to make the anticipating subject matter.')

(Slip op. at page 5.)

Lacking enablement, the publication is not anticipatory.

B.    A Sale Abroad is Not a Patent  
      Defeating Act and Thus is Not Prior Art

35 USC 102(b) specifies also that a patent-defeating act is public use of the invention or placing the invention on sale "in this country, more than one year prior to the date of the application for patent in the United States." Thus, public use of the invention outside the United States or placing the invention on sale outside the United States is not a patent-defeating act.

The error in the Examiner's position, we say with respect, is that the sale abroad is permitted to be considered jointly with the published PBR application. The sale is not prior art under Title 35 United States Code. The present situation is not analogous to that in In re Samour, 571 F.2d 559, 197 USPQ 1 (CCPA 1978) where the rejection was based upon a consideration of two U.S. patents, each of which clearly qualified as prior art under 35 USC 102. Indeed, we have a situation here where neither piece of evidence relied on to support the rejection qualifies as prior art under 35 USC 102. The rejection to be proper must be made under statutory law, not metaphysical law.

C.    Other Justifications Posed by the  
      Examiner Do Not Make the Rejection Proper

The Examiner has also cited Ex parte Thomson, 24 USPQ2d 1618 (Bd. Pat. App. & Inter. 1992) in support of the rejection. The

holding does not support the instant rejection. (The USPTO did not use Thomson as a basis for a rejection of this type until recently.) That case involved a utility application rather than a plant patent application. Moreover, the materials sold in that case were seeds, not plants. The Board panel justified its decision by stating that the necessary enablement came about "by purchase and planting of the requisite seeds." 24 USPQ2d at 1620. The panel also distinguished the situation in In re LeGrice, 133 USPQ 365 (CPA 1962) from the situation before it, pointing out, "Unlike the seeds of the asexually reproduced roses of LeGrice which would not produce the claimed rose, the sexually reproduce [sic] of the Siokra cultivar do reproduce the claimed Siokra cultivar." 24 USPQ2d at 1621. The panel in a footnote to the foregoing sentence remarked, "Another point of distinction is that whereas LeGrice concerned a plant patent, appellant seeks a utility patent, which affords a broader scope of protection." The Thomson and LeGrice cases presented distinctly different situations and neither bars patentably here. Indeed, LeGrice permits patentability in this case. The LeGrice court surely was aware that the plants in that case had been sold abroad; see the sentence in the first paragraph of the opinion reading "The publications occur in the National Rose Society Annual of England and in catalogues." 133 USPQ at 367. The court did not use those sales

as a basis to affirm the position of the Patent Office there. The court, rather, reversed the rejection under 35 USC 102 holding the publications to be non-enabling.

The holdings in neither In re Samour nor In re Donahue support the rejection. All of the references used in the "combined" 35 USC 102 rejections in those opinions were de jure prior art to the respective appellants. That situation does not exist here.

D. The Rejection is in Violation  
of the UPOV Convention

Moreover, the position taken by the USPTO in a rejection of this type is believed to violate the UPOV Convention.

Chapter III, Article 6 of the UPOV Act of 1991 includes the following:

(1) Criteria-the variety shall be deemed to be new if, at the time of filing the application for a breeders' right, propagating or harvested material of the variety has not been sold or otherwise disposed to others, by or with consent of the breeder, for purposes of exploitation of the variety (i) in the territory of the contracting party in which the application has been filed earlier than one year before that date and (ii) in a territory other than that of the contracting party in which the application has been filed earlier than four years or in the case of trees and vines, earlier than six years before that date. (Emphasis added.)

In the present case, the U.S. filing date was July 12, 2001, and the first sale abroad was in December 1998. Thus, 'White Elite Reagan' meets the criteria for novelty in the UPOV 1991 Act to be

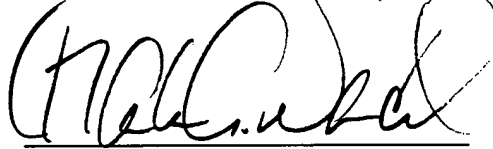

eligible for a PBR grant in the USA. It is believed that the same criteria should be applied to plant patents and the claim is patentable for this and the other reasons presented.

IX. CONCLUSION

For the foregoing reasons, it is respectfully submitted that claim 1 has been improperly rejected and the Board is asked to so hold.
